

I know in my area that the regular radio stations do not know have of what is played by xm radio. Local stations try and fit traffic and weather segements in 15-20 seconds announcements that you hardly can understand and you have to wait 15-30 minutes just to here what you missed. This is one of the best reports that I enjoy to listen to and fully support and pay for outta of my personal pocket for a service that is provided for me. Thank you Bernie Millheim a concerned customer of XM Radio
